Dual-media water Conditioners

For consumers who demand "the very best"!

Our popular dual media water conditioners utilize Vortech™ patented distributor technology to maximize your media efficiency with two separate media chambers in one tank.

1. **Activated Carbon** for pre-treatment removes chlorine taste, odors and extends ion exchange resin life.
2. **High Efficiency Ion Exchange Resin** for increased efficiency and to enhance performance with high iron content water.

Shown with optional stainless steel jacket

Features & Benefits

- Designed for whole house water treatment.
- Carbon pretreatment provides extended resin life.
- High salt and water efficiency.
- Low cost, single tank design with only one (1) control valve.
- No media migration for more contact time and increased efficiency.
- Lower pressure drop.
- Space saving single tank design.

Contaminants Removed

- ✓ Removes hardness
- ✓ Removes chlorine
- ✓ Removes taste and odor
- ✓ Removes iron*

Metered valve for greater efficiency

- Solid state micro processor.
- Configuration in non volatile memory.
- Capacitor back-up.
- Noryl™ construction.
- Digital LCD display.

Vortech® Tank

- No gravel under bedding.
- 1- 1/2 X's the open surface area of a traditional cone and gravel system for lower pressure drop.
- Permanently attached riser tube.
- Exclusive Vortech Extrusion manufacturing process
- **100% Made in the USA**
- NSF Certified

Watts® 525 Premium Series RO Systems

Certified by NSF International

Best Selling Product. Try it today!

W-525

Features & Benefits

Watts "525" ROs are our best selling certified model, offering third party documentation and exceptional performance! Features and benefits include:

- Five stage treatment for superior performance.
- 50 GPM membrane (Made in USA).
- Designer chrome faucet with ceramic disc for greater durability.
- Genuine John Guest® fittings throughout for optimum security.
- 3/8" post filter and 3/8" tubing to faucet for greater flow.
- Assembled in USA.
- Certified by NSF International (Std. 58) for third party documentation.
- Certified to NSF / ANSI Std. 58 for Pentavalent Arsenic reduction.
- One year limited warranty from date of purchase.

Hard Water Problems

- Dry, Itchy Skin
- Dull, lifeless hair
- Water spots on glassware
- Deposits and scale on fixtures and pipes
- Scratchy, dingy clothing
- Bottled water waste
- Bad taste
- Expensive chemical cleansers, fabric softeners, and rinse agents
- Drive to store to get more water

Clean Water Benefits!

- Soft, Smooth Skin
- Shiny, soft hair
- Prevents spotting
- Prevents scale - protects fixtures
- Clean, soft laundry
- No plastic waste
- Good, clean tasting water
- Use less chemicals, and save money
- Many gallons of clean water per day
